

MORE ON THE WAY

Second Company of Farmers for Ewa Coming.

Forty Persons From California. First Colony Settled—Good Cottages—The Terms.

W. J. Lowrie, manager of Ewa plantation has taken the initiative in an important movement by the introduction of a colony of American farmers from Southern California who are to cultivate a portion of the company's land on the co-operative or profit sharing system.

The first company of the planters, consisting of eight men, two women and four children arrived in Honolulu, Oct. 9, by the R. P. Rithet.

The company's agent in California will send forty more on or about Oct. 20.

A representative of the Advertiser visited Ewa mill Saturday for the purpose of interviewing Mr. Lowrie upon the subject.

Mr. Lowrie maintains that inasmuch as the co-operative plan has been introduced successfully in other countries where it proved advantageous to both employer and employee, that the conditions in Hawaii are such as to warrant giving it a fair trial, which he proposes to do.

The company has already prepared ground for, and planted two hundred acres of sugar cane which is to be turned over to twenty planters who are to cultivate the same in common and upon equal shares. At maturity the cane will be cut by the plantation, the expense of which is to be borne by the planters, who, during the cutting of the cane will be employed in getting the same to the mill. The planters are to receive for their labor one-sixth of the net proceeds realized for the sugar manufactured from the cane grown on the land cultivated by them—each planter to receive of such one-sixth an amount proportioned to his labor in cultivating the same.

The company will furnish the planters with cottages in which to live, one-fifth of an acre of land each, to be used for a kitchen, garden, fuel and water for domestic use, and water for garden irrigation and when necessary the services of a physician, all free of charge. The cottages each contain four large rooms, with verandas both in front and rear with a cook house 12x12 adjacent.

The cottages are located about three miles from the mill on an elevation from which a grand view is had of the surrounding country.

The company advances to each planter eighteen dollars per month to be used for necessary living expenses until such time as the crop shall be harvested and sold and an accounting had, when all money advanced will be the proceeds. The men are all experienced farmers and should soon familiarize themselves with the methods necessary to insure the successful cultivation of Hawaii's chief product.

When questioned regarding the climate the new farmers say that it is as absurd for any one to suppose that a white man cannot be employed to do all the work upon a plantation that is now done by Japanese. They stated that they had been accustomed to work in the fields with the thermometer up to 118 deg.

The general public has evinced great interest in Manager Lowrie's experiment and will follow it very closely.

Total, 365.

Lives and Loves.

A thoughtful man, being unselfish, exalted his wife before others. And great and lasting and sincere was the love of that woman for that husband. A foolish fellow, vain of a poor wit and abusive of authority, embarrassed and humbled a dutiful wife before others. And a wife's heart ached till one love left it.

U. S. Branch Hydrographic Office, San Francisco, Cal.

By communicating with the Branch Hydrographic Office in San Francisco, captains of vessels who will co-operate with the Hydrographic Office by recording the meteorological observations suggested by the office, can have forwarded to them at any desired port, and free of expense, the monthly pilot charts of the North Pacific Ocean and the latest information regarding the dangers to navigation in the waters which they frequent.

Mariners are requested to report to the office dangers discovered, or any other information which can be utilized for correcting charts or sailing directions, or in the publication of the pilot charts of the North Pacific.

WHARF AND WAVE.

Smooth weather on Kauai coast.

The Philadelphia reached San Francisco on the 8th.

The steamer Nocu carried the Hilo mail last Saturday.

Waimea plantation finished this season's crop last week.

The bark R. P. Rithet is discharging at Oceanic wharf.

The steamer W. G. Hall includes Nilhan in her trip to Kauai this week.

Seventy-two head of Greenwell cattle in fine condition arrived from Kona on the steamer Kauai last Saturday.

Twelve thousand sacks of sugar will be the ballast cargo for the schooner Aloha to San Francisco next week.

The S. N. Castle is in San Francisco in sixteen days, the fastest run of the season. The Tacoma and Indiana have arrived.

Signal drill was practiced on the Bennington yesterday morning. Many people hearing the whistles thought there was a fire on board the war ship.

The Hawaiian ship Helen Brewer has been repaired in dry dock at Shanghai. Her stem was bent and twisted, and 11 bow plates more or less damaged. She sailed September 24 for Batavia.

Station Keeper Peterson, of Diamond Head, asserts that there is no reason for the tug patrolling off that vicinity in search of contraband opium or suspicious schooners. He keeps a vigilant watch and reports all vessels and their movements that come within his range promptly.

Cashier Willie White, of Fort street wharf, now visiting San Francisco, will return to the islands next month. According to a report on the Alameda Willie was not taken much with San Francisco sights and noises and intended going to Pasadena or some country place for quietness.

The barkentine Archer cleared at the custom house last Saturday for San Francisco with the following cargo: 7,536 bags of sugar, 834,919 pounds, valued at \$29,880, and shipped by C. Brewer & Co. for account of Pahaia Plantation (5,959 bags) and Castle & Cooke for account of Waimea Plantation (1,577 bags).

The British ship Marion Inglis, 1,483 tons, furnishes some encouragement to the owners of sailing craft. This ship on a voyage of 11½ months earned a profit of 36 per cent, and paid a dividend of thirty per cent to the shareholders, carrying the balance to a reserve fund. Evidently the future of the sailing ship does not appear to be so bad as the pessimists try to make out.

The island steamers sailing today are: Steamer Kinan, Clarke, for Lahaina, Maiala, Kihel, Makena, Kawaihi, Mahukona, Onomea, Kapaehou and Hilo; Kaunakakai and Laupahoehoe, mail and passengers only, 10 a. m. Steamer Claudine, Cameron, for Lahaina, Kahului, Keane, Hana, Hamoa, Kipahulu and Nahiku, 5 p. m. Steamer Hawaii, McDonald, for Laupahoehoe, Pepeekeo, Honohina, Hakalau and Honolulu, 4 p. m. Steamer Lehua, Bennet, for Kaunakakai, Kamalo, Pukoo, Halawa, Hailan, Pelekuu, Kalaupapa, Lahaina, Olowalu, Lanai and Honolulu, 5 p. m. Steamer Kauai, Bruhn, for Lahaina at 4 p. m. Steamer W. G. Hall, for Nawiliwili, Hanalei, Koloa, Elele, Hanapepe, Makawili, Waimea, Kekaha and Nilhan, at 5 p. m.
